

JBC FLUX

Cleaning Agent

JBC Flux is a cleaning agent specifically developed for desoldering of components in repaired circuits.

Flux is used in hand soldering and the main purpose is to prepare the metal surfaces by cleaning, removing any impurities and protecting the metal surfaces during soldering.

JBC has 3 different Cleaning Agent containers depending on demands:

- Refillable Brush Pen for Flux Application
- Flux Bottle with Applicator 15 ml / 0.186floz
- Flux Bottle 500ml / 16.907floz

Cleaning Agent

FL	5.5 ml
FL15	15 ml
FL50	500 ml
